

State of Wisconsin
Governor Scott Walker

Department of Agriculture, Trade and Consumer Protection

Certificate Number: _____

WISCONSIN EUROPEAN CORN BORER CERTIFICATE

I hereby certify that the following described lot or shipment of shelled corn has been screened with a 1/2-inch or less mesh screen prior to loading and is believed to be free from stalks, cobs, stems, or portions of plants or fragments thereof capable of harboring larvae of the European Corn Borer and, further, that the railcar or truck was free from such plants, fragments, etc., at time of loading.

- Railcar/truck inspected and found to be clean before loading.
- Screens checked and shipment properly screened.
- Loading process believed to meet requirements.

Commodity: _____ Lot/Shipment #: _____ Quantity of shipment: _____

Name and address of screening facility: _____

Name and address of consignee: _____

Railcar/truck #: _____ Date screened: _____

Expiration Date: _____

An equal opportunity employer

CHECK BOXES - On the top left side of the certificate are three certification requirements that need to be verified and checked off. The first refers to the railcar inspection; the second, screening procedure; and the third, the loading process.

COMMODITY - Enter the grain to be shipped - corn, sorghum, etc.

QUANTITY OF SHIPMENT - Enter the total amount AND unit (pounds or bushels).

NAME AND ADDRESS OF ELEVATOR - Enter the name and address of your screening facility.

NAME AND ADDRESS OF CONSIGNEE - Enter the name and address of the company where the grain is being shipped, not the broker's information. The consignee **MUST** be outside of the state of Wisconsin.

RAILCAR/TRUCK NUMBER - If a truck is used to transport the grain, list the license plate number and the name and address of the truck owner. If the grain is shipped by railroad, list the railcar number. If being sent by Unit Train, one European Corn Borer Certificate may be completed for all of the railcars in the unit. However, all the railcars must be listed on the certificate or on an attached list. Some facilities make a copy of the certificate for each railcar, in case one of the railcars is taken out of the unit due to mechanical problems or other issues. It is best to contact your depot agent to see how they prefer to handle the certificates for Unit Trains.

DATE SCREENED - Enter the date the grain was screened.

INSPECTOR SIGNATURE - The inspector authorized by the licensed facility to sign the certificate must sign his/her name in full; no initials are to be used. The inspector is responsible for making sure that the shipment is free of stalks and debris of ½ inch or larger in diameter.

CERTIFICATE REQUIREMENTS

CERTIFICATES MUST ACCOMPANY THE SHIPMENT

EMAIL IN CERTIFICATE COPIES – Email the WDATCP a copy of the certificate to greg.helmbrecht@wisconsin.gov, they are to be sent in to WDATCP immediately upon issuance. To help avoid situations of grain shipment rejections, we need this copy to verify the certification in order for the shipment to be released.

RETAIN A COPY OF EACH CERTIFICATE FOR ONE YEAR
